Summary

I'm a web developer with over 3 years of experience.
I thrive in community-based workplaces where everyone is engaged in learning together. I am a good communicator with a versatile set of skills. I speak both Portuguese and English.

I particularly enjoy working with **JavaScript-driven technologies**, and my primary focus is on frontend technologies. However, that does not stop me from contributing to backend development when needed.

You can learn more about my work in the experience section to gain a better understanding of my past work. :)

Swimmer - Cat Lover - Cooking

Skills

React.js • JavaScript • TypeScript • Redux • Context API • Git • jQuery • CSS • SASS • HTML • Next.js • NestJS • Google Maps API • d3.js • TDD • Jest • Cypress • Java • Firebird • PostgreSQL • DBeaver

Other Skills

Mentoring • Code Review • Requirements Gathering • Literature Reviews • Interviewing Coordinate Meetings

Education

Universidade Estadual do Centro-Oeste
Bachelor's Degree in Computer Science (2014 - 2019)

Experience

Full Stack Developer
NextMed (Translational Analytics & Statistics)
Jun 2022 - Present (1 year 10 months)
At this job, I'm mainly a frontend developer, but I do tend to dip my toes into the backend whenever it's needed, whether it's for bug corrections, dealing with large SQL queries, or bringing in more data to be consumed on our frontend.

I also work on our billing engine, which is responsible for managing all past and future invoices for our laser treatments. This involves maintaining the application, incorporating

new technologies, refactoring old code, and frequently debugging code for accurate payments and balances.

Company Owner

Nimmu Labs LTDA Jun 2022 - Present (1 year 10 months)

Nimmu Labs is my own software development company that has been operating since 2022.

Solutions Engineer

Intellimize Mar 2021 - Jun 2022 (1 year 4 months)

Intellimize intelligently optimizes each buyer's path to drive more revenue, customers, or leads to sales from websites through A/B testing. This enables you to determine which design works best for your customers and what drives more sales.

In this position, I acquired a significant amount of CSS knowledge through making changes to our customers' websites. I was part of a large team that worked extensively with pure JavaScript, CSS, and jQuery.

Web Developer

Codeminer42 Sep 2020 - Jun 2022 (1 year 10 months)

Codeminer42 is a Brazilian software boutique dedicated to delivering optimal value to its customers. Our specialization lies in web development, primarily utilizing Rails and JavaScript-driven technologies.

During my time at Codeminer42, I engaged in various responsibilities beyond my assigned project:
- I contributed to the blog team, involved in blog management and reviewing posts written by colleagues;
- Conducted interviews to assess the English proficiency of potential new hires;
- Served as a mentor in their trainee program for two consecutive years;
- Initiated and led a study group for female developers/students;
- Participated in workshops, study groups, meet-ups and much more.

Additionally, I had the opportunity to work with two different clients while at Codeminer42: Grano Capital and Intellimize—an international customer where I spent the majority of my time.

Frontend Developer

Grano Capital Sep 2020 - Mar 2021 (7 months)

Worked as a frontend developer for Grano Capital on their rural producer financing tool. In this role, I extensively utilized Javascript, HTML, CSS, maps, and d3.js. Additionally, I took the lead in conducting team meetings directly with the customer.

Fullstack Projects Developer

Grupo Itax Feb 2020 - Sep 2020 (8 months)

During my time at Grupo Itax, I worked as a full-stack developer, closely working with Java and JavaScript.

My responsibilities included overseeing the company's databases, which utilized Firebird and PostgreSQL. Additionally, I provided user support by addressing errors, conducting training sessions on tool usage, and directly gathering requirements from users for the development of new tasks.

Intern

UniGuairacá Centro Universitário Feb 2016 - Dec 2017 (1 year 11 months)

I was hired as their lab tech while being a student at my university. My duties included maintaining their computers, ensuring everything was functioning properly—a role heavily focused on hardware. I also assisted users with their needs and supported professors as required.
